Markus Stubbig

Practical OPNsense

Errata

- **Page 57** (Chapter 4): Paragraph starting with "Using the example of RT-1...". The correct IPv4 address of RT-3 is *192.0.2.3* (not: 198.51.100.3) and the shared network segment is *WAN2* (not: WAN1). Figure 4.3 shows the correct addresses.

- **Page 228** (Chapter 16): The IEEE standard for *Link Aggregation* is IEEE 802.3ad (not: IEEE 802.1ad).

- **Page 85** (Chapter 7): Paragraph starting with "Create network bridge". The network bridge is created between the *DMZ* (not: *LAN*) and *WAN2* interfaces.
